BUSINESS RESPONSIBILITY REPORT 2019-20

Business Responsibility Report

INTRODUCTION

At Reliance Industries Limited (RIL), sustainability is viewed as environmental and social responsibility, which allows the Company to deliver on stakeholder expectations. RIL continues to communicate the Company's obligations and performance to all its stakeholders through its Business Responsibility Report (BRR).

As a responsible corporate citizen, RIL continues to actively engage with all its stakeholders to drive their growth for all. The Company believes in accelerating India's transition to a knowledge economy and continues its efforts to create value for India by elevating the quality of life across the entire socio-economic spectrum.

This report conforms to the Business Responsibility Reporting (BRR) requirement of the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 (SEBI LODR) and the National Voluntary Guidelines on Social, Environmental and **Economic Responsibilities of Business** (NVGs) released by the Ministry of Corporate Affairs (MCA), Government of India. To provide guidance to businesses regarding responsible business conduct, the MCA released a set of guidelines in 2011 called the National Voluntary Guidelines on the Social, Environmental and Economic Responsibilities of Business (NVGs). In order to align the NVGs with

the Sustainable Development Goals, UNGP, new principles called the National Guidelines on Responsible Business Conduct (NGRBC) were formed in March 2019. RIL is one of the pioneers to adopt the NGRBC guidelines.

The Company publishes its sustainability performance in a Sustainability Report, which is prepared in accordance with Global Reporting Initiative (GRI) standards and is externally assured. All the Sustainability Reports published till date can be accessed at www.ril.com.

NVG PRINCIPLES

1. ETHICS, TRANSPARENCY AND ACCOUNTABILITY

Businesses should conduct and govern themselves with ethics, transparency and accountability

4. STAKEHOLDER ENGAGEMENT

Businesses should respect the interests of, and be responsive towards all stakeholders, especially those who are disadvantaged, vulnerable and marginalised

7. POLICY ADVOCACY

Businesses, when **engaged** in influencing **public and regulatory policy**, should do so in a **responsible manner**

2. PRODUCT LIFE CYCLE SUSTAINABILITY

Businesses should provide goods and services that are safe and contribute to sustainability throughout their life cycle

5. HUMAN RIGHTS

Businesses should respect and promote human rights

8. INCLUSIVE GROWTH

Businesses should support inclusive growth and equitable development

3. EMPLOYEES' WELL-BEING

Businesses should promote the well-being of all employees

6. ENVIRONMENT

Businesses should respect, protect and make efforts to restore the environment

9. CUSTOMER VALUE

Businesses should **engage** with and **provide value** to their **customers and consumers** in a responsible manner

ANNEXURE 4

SECTION E: PRINCIPLE-WISE PERFORMANCE

| Disclosures | Information/Reference sections | | | | | |
|---|---|--|--|--|--|--|
| Principle 1: Ethics, Transparency And Accountability | BUSINESSES SHOULD CONDUCT AND GOVERN THEMSELVES WITH ETHICS, TRANSPARENCY AND ACCOUNTABILITY | | | | | |
| Coverage of the Code of Conduct | Annual Report 2019-20, Human Capital and People Connect, Page no. 122 | | | | | |
| policy and details of stakeholder complaints received and resolved in | Annual Report 2019-20, Corporate Governance Report, Page no. 184 | | | | | |
| FY 2019-20 | For Investor Complaints please refer to Annual Report 2019-20, Corporate Governance Report, Page no. 184 | | | | | |
| Principle 2: Product Life Cycle Sustainability | BUSINESSES SHOULD PROVIDE SAFE GOODS AND SERVICES THAT CONTRIBUTE TO SUSTAINABILITY THROUGHOUT THEIR LIFE CYCLES | | | | | |
| Products or services incorporating social or environmental concerns | As a global business leader, RIL continuously endeavours to address that environmental and social concerns that are reflected in its business processes and products. Some such products created during FY 2019-20 have been listed below: | | | | | |
| | a. PET-based fabric recycling: In an attempt towards fostering the circular economy and addressing the environmental burden caused due to discarded PET-based fabrics, RIL is targeting to separate PET from fabric blends and convert it back into fibres and eventually into fabric. | | | | | |
| | b. Slag waste to chemicals – Green process to recover metals from slag waste: Conventionally, Hydro or Pyro process is employed to extract metals from waste and this process requires a large quantity of acid or alkali for leaching, which involves very high temperature. i.e., above 1,700 °C. RIL has developed a low-cost low-temperature hybrid green process to extract vanadium from gasifier slag. | | | | | |
| | c. Ionic liquids replacing Hydrofluoric Acid (HF) – Replacing hazardous catalyst: For manufacturing of Linear Alkyl Benzenes (LAB), RIL developed an Ionic Liquid (IL)-based technology to replace the Hydrofluoric Acid (HF) catalyst, which is potentially hazardous. LAB produced form the pilot plant has been used for market seeding. This process significantly reduces the risk of health and environmental hazards of operation. | | | | | |

Disclosures

Information/Reference sections

Research and technology at RIL create superior value by harnessing internal research and development skills and competencies and create innovations in emerging technology domains related to RIL's various businesses. Research and technology at RIL focuses on (i) new products, processes and catalyst development to support existing business and create breakthrough technologies for new businesses, (ii) advanced troubleshooting, and (iii) support to capital projects, and profit and reliability improvements in manufacturing plants.

Some of the products, which incorporate environmental and social concerns in their design, are:

- I. Disentangled Polyethylene (DPE) based specialty products: High-strength tapes and fibres for armour and automotive
- II. ESBR: Technology development of functional ESBR grades for silica-based composites for green tyre
- III. RelfarmS: To add value to refinery elemental sulphur to develop a new product RelFarmS as soil nutrient to enhance crop yield and use it in converting sodic soil to cultivable soil
- IV. Biodegradable Polymers: Technology development for Biodegradable Blends and Its Polymer (Packaging films for Reliance Retail applications)
- V. Waste Plastic to Oil: Development of process for waste plastic conversion to oil
- VI. R-Cat Hydrothermal Liquefaction Technology (HTL): Development of catalytic HTL for converting wet waste to wealth
- VII. Fuel Cell: Technology development of methanol-based fuel cells for Jio towers and evaluating application for mobility
- VIII. Hydrogen Economy: Assessing hydrogen economy to disrupt transportation and power/industrial sector

Principle 3:

Employee Well-Being

Total workforce by various indicators of diversity (e.g. gender, physical disability, contract labour etc.) and efforts for their skill enhancement

BUSINESSES SHOULD PROMOTE THE WELL-BEING OF ALL EMPLOYEES

The total number of employees is 26,488 as on 31st March, 2020. The total number of permanent women employees is 1,552 as on 31st March, 2020. The total number of permanent employees with disabilities is 55 as on 31st March, 2020.

Health and safety of employees is of paramount importance to RIL, and to create safe workplace emphasis is given on health and safety related training programmes. During FY 2019-20, RIL imparted 1.69 million man-hours of training to its workforce. RIL's contractual employees receive mandatory safety training before entering the Company's premises and also acquire on-the-job training through the contractor and the Company.

At RIL, 94% of its permanent workforce received safety and skill upgradation trainings. 59% of women employees received trainings through classroom and web-based training programmes. Out of 55 permanent employees with disabilities, 24% received safety and skill upgradation trainings. RIL ensures 100% employee participation in safety and mock fire drills.

Workforce representation and grievance redressal

Principle 4:

Stakeholder Engagement

Identification and engagement with stakeholders, including the vulnerable and marginalised groups

BUSINESSES SHOULD RESPECT THE INTERESTS OF AND BE RESPONSIVE TOWARDS ALL STAKEHOLDERS, ESPECIALLY THOSE WHO ARE DISADVANTAGED, VULNERABLE OR MARGINALISED

RIL has taken the path of inclusive development to address the societal issues and engage with the disadvantaged, vulnerable and marginalised stakeholders. At RIL, there are certain critera for selecting a social development project. To determine the beneficiaries, the Company undertakes a community need assessment in which the local people express their requirements in the areas of agriculture, livestock, health, education, access to information among others and rank those in the order of priority.

The Company has identified communities from the poor and marginal sections of the society as its primary stakeholders. These include the rural population living below subsistence level (such as the landless, small and marginal farmers, small fishermen, under skilled and unemployed youth), children and youth from poor socio-economic background, adolescent girls and women, HIV patients, visually impaired and others.

| Disclosures | Information/Reference sections |
|---|--|
| | The Company directly engages with these communities to understand their needs and other major |
| | challenges impeding their development and accordingly plan interventions to benefit them. In the |
| | process, the communities are also capacitated and engaged to carry forward the development agenda. |

SECTION C: PRINCIPLE-WISE PERFORMANCE DISCLOSURE

Disclosures

Information/Reference sections

Principle 1: Integrity, Ethics, Transparency and Accountability

Essential Indicators

Review of performance by top management against the principles and core elements

Awareness programmes and complaints received across the Principles and Core Elements of the Guidelines

The Company has constituted a Corporate Social Responsibility and Governance Committee which assists the Board in formulating and monitoring the implementation of sustainability and overall governance regarding social responsibility.

The Committee also oversees the implementation of policies mentioned in the Business responsibility manual covering the principles and core elements of the Guidelines. The Committee reviews the Business Responsibility Report and recommends the Board for the approval.

The Company aims to follow and promote sustainable business practices and continuously strives to create awareness among all the stakeholders. The leadership team was informed regarding the new principles released, called the National Guidelines on Responsible Business Conduct (NGRBC).

Annual Report 2019-20, Corporate Governance Report, Page no. 184

Annual Report 2019-20, Board's Report, Page no. 212

Leadership Indicators

Describe the reporting mechanism of responsible business practices

Percentage of stakeholders covered by social and environmental audits

RIL has developed its Annual Report based on the applicable accounting standards and has incorporated the principles of the International Integrated Reporting (<IR>) Framework (<IR>) published by the International Integrated Reporting Council (IIRC) into the Management Discussion and Analysis section of the Report. The sustainability disclosures in Annual Report are assured using reasonable assurance criteria as per ISAE 3000 (Revised) standards. The assurance statement provided by KPMG India is available in the 'Independent Assurance Statement' section of the Integrated Annual Report.

A large number of RIL's suppliers are multi-national Original Equipment Manufacturers (OEMs). The Company has observed that all these companies regularly publish sustainability performance and are quite advanced in the sustainability curve. RIL requires its smaller scale suppliers to ensure they implement environmental as well as health and safety initiatives to make their operations green as well as safe. The Company also ensures that they are compliant to all regulatory requirements and review their performance on a regular basis. This helps the Company to ensure continuity of its suppliers' businesses and thereby its own business as well.

Annual Report 2019-20, Social and Relationship Capital and Value Creation, Page no. 156

Independent Reasonable Assurance Statement Annual Report 2019-20 Page no. 182

Principle 2: Safe and sustainable goods and services

Essential Indicators

Details of investment in specific technologies along with percentage of input material and services sourced from suppliers adhering sustainability standards

As a global business leader, RIL continuously endeavours to address environmental and social concerns, which is reflected in its business processes and products. Some such products created during FY 2019-20 have been listed below:

Disclosures

Information/Reference sections

a. RELX Composites:

Reliance Composite Solutions (RCS), commissioned an unsaturated polyester resin plant under the trademark RELX[™]. In FY 2019-20, RCS has developed interiors panels and front mask of driver cabin coached for Mumbai Metro project. RCS is also working with many other similar metro projects across India. In addition to this, RCS has successfully completed developmental order of ICF for interior panel and Toilet Modules.

Other major development are as follows:

- IRIS Certification for Design, Development and Manufacturing of Vehicle Body, Vehicle fittings and Interiors for rail applications
- BIS certification for Glassfiber Reinforced Plastics (GRP), Pipes for portable water (IS12709) and also for Sewerage, Industrial waste and water other than portable (IS14402)
- 3. Initiation of exports for GRP parts used in infrastructure
- 4. Petroleum and Explosives Safety Organisation (PESO) approval received for Underground Fuel Storage Tank applications.

b. Ionic liquids replacing Hydrofluoric Acid – replacing hazardous catalyst

For manufacturing of Linear Alkyl Benzenes (LAB), RIL developed an Ionic Liquid (IL)-based technology to replace the Hydrofluoric Acid (HF) catalyst which is potentially hazardous. LAB produced form the pilot plant has been used for market seeding. This process significantly reduces the risk of health and environmental hazards of operation.

c. Recycling of PET bottles:

Research and technology at RIL helps create superior value by harnessing internal research and development skills and competencies and creates innovations in emerging technology domains related to RIL's various businesses. Research and technology at Reliance focus on (i) new products, processes and catalyst development to support existing business and create breakthrough technologies for new businesses, (ii) advanced troubleshooting, and (iii) support to capital projects, and profit and reliability improvements in manufacturing plants.

Some of the products that incorporate environmental and social concerns in their design are:

- a. Disentangled Polyethylene (DPE) based specialty products: High-strength tapes and fibres for armour and automotive
- b. ESBR: Technology development of functional ESBR grades for silica-based composites for green tyre
- c. RelfarmS: To add value to refinery elemental sulphur to develop new product -RelFarmS a) as soil nutrient to enhance crop yield and b) to convert sodic soil to cultivable soil.
- d. Biodegradable polymers: Technology development for Biodegradable Blends and their Polymer (Packaging films for Reliance Retail applications)
- e. Waste plastic to oil: Development of process for waste plastic conversion to oil
- f. R-Cat Hydrothermal Liquefaction Technology (HTL): Development of catalytic HLT for converting wet waste to wealth
- g. Fuel Cell: Technology development of methanol-based fuel cells for Jio towers and evaluating application for mobility
- h. Hydrogen Economy: Assessing hydrogen economy to disrupt transportation and power/industrial sector

Leadership Indicators

Communication of impacts to various stakeholder groups and examples on how the feedback received from stakeholders is used for improvements RIL continues to collaborate and emphasises on maintaining long term association with its stakeholders.

RIL encourages the local vendors for indigenisation. To gain significant cost and quality advantage, the Company emphasises on supplier collaboration. Mission Kurukshetra is a step towards democratising creativity and innovation within the organisation. Through the Mission Kurukshetra platform, the employees can submit ideas and track their progress right up to implementation.

INDEPENDENT REASONABLE ASSURANCE STATEMENT TO RELIANCE INDUSTRIES LIMITED ON THEIR SUSTAINABILITY DISCLOSURES IN THE INTEGRATED ANNUAL REPORT FOR FINANCIAL YEAR 2019-20

To the Management of Reliance Industries Limited, 3rd Floor, Maker Chambers IV, 222, Nariman Point, Mumbai 400021, Maharashtra, India.

INTRODUCTION

We ('KPMG in India', or 'KPMG') have been engaged for the purpose of providing assurance on the selected Sustainability disclosures presented in the Integrated Annual Report ('the Report') of Reliance Industries Limited ('RIL' or 'the Company') for FY 2019-20. Our responsibility was to provide reasonable assurance on the Report content as described in the boundary, scope and limitations, as part of the Company's sustainability reporting assurance process.

REPORTING CRITERIA

RIL has developed its report based on the applicable accounting standards and has incorporated the principles of the International Integrated Reporting Framework (<IR>) published by the International Integrated Reporting Council (IIRC) into the Management's Discussion and Analysis section of the Report.

Its sustainability performance reporting criteria has been derived from the GRI Standards of the Global Reporting Initiative, United Nation's Sustainable Development Goals (UN SDGs), American Petroleum Institute - The International Petroleum **Industry Environmental Conservation** Association (API/IPIECA) Sustainability Reporting Guidelines, and Business Responsibility Reporting Framework based on the principles of National Voluntary Guidelines on Social, Environmental and **Economic Responsibilities of Business** (NVG - SEE), World Business Council for Sustainable Development's focus areas and Accountability's AA1000APS 2008 (Principles of Inclusivity, Materiality and Responsiveness).

Other Frameworks/Initiatives

RIL, has also referred to new and emerging frameworks such as National Guidelines on

Responsible Business Conduct (NGRBC), Task Force on Climate-related Financial Disclosures (TCFD) recommendations, United Nations Guiding Principles on Business and Human Rights (UNGP), United Nations Global Compact (UNGC) Principles, Global Recycle Standard (GRS) Version 3.0, Natural Capital Protocol, Social and Human Capital Protocol, the selected Government of India's National Missions and Transition Pathway Initiative (TPI).

ASSURANCE STANDARDS

We conducted the assurance in accordance with

- Reasonable Assurance requirements of International Federation of Accountants' (IFAC) International Standard on Assurance Engagement (ISAE) 3000 (Revised) Assurance Engagements Other than Audits or Reviews of Historical Financial Information
- Under this standard, we have reviewed the information presented in the report against the characteristics of relevance, completeness, reliability, neutrality and understandability.

BOUNDARY, SCOPE AND LIMITATIONS

- The boundary of assurance covers the sustainability performance of RIL's manufacturing divisions, refineries, exploration and production in India; business divisions such as chemicals; fibre intermediates; petroleum; polyester; polymers; Reliance Foundation and corporate office at Reliance Corporate Park, for the period 1st April, 2019 to 31st March, 2020.
- The sustainability disclosures covered as part of the scope of the assurance process were limited to water recycled and reused, reduction of energy consumption, total number of employees at RIL and total man-hours of training provided to RIL workforce.
- The assurance process was limited to the selected sustainability disclosures at relevant sections in the annual integrated report.

- The selected disclosures on the other reporting criteria and frameworks/ initiatives were restricted to those that were shared by the Company with KPMG and are mentioned in this report.
- The assurance scope excludes;
 - Aspects of the report other than those mentioned above;
 - Data and information outside the defined reporting period;
 - The Company's statements that describe expression of opinion, belief, aspiration, expectation, aim or future intention and assertions related to Intellectual Property Rights and other competitive issues

ASSURANCE PROCEDURES

Our assurance process involves performing procedures to obtain evidence about the reliability of specified disclosures. The nature, timing and extent of procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the selected sustainability disclosures whether due to fraud or error. In making those risk assessments, we have considered internal controls relevant to the preparation of the Report in order to design assurance procedures that are appropriate in the circumstances. Our assurance procedures also included:

- Assessment of RIL's reporting procedures regarding their consistency with the application of GRI Standards.
- Evaluating the appropriateness of the quantification methods used to arrive at the sustainability disclosures presented in the Report.
- Verification of systems and procedures used for quantification, collation, and analysis of sustainability disclosures included in the Report.
- Understanding the appropriateness of various assumptions, estimations and materiality thresholds used by RIL for data analysis.
- Discussions with the personnel responsible for the evaluation of competence required to ensure

- reliability of data and information presented in the Report.
- Discussion on sustainability aspects with senior executives at the different plant locations and at the corporate office to understand the risks and opportunities from sustainability context and the strategy RIL is following.
- Assessment of the stakeholder engagement process through personal interviews and review of relevant documentation.
- Assessment of data reliability and accuracy.
- For verifying the data and information related to RIL's financial performance we have relied on its audited Financial Statements for the FY 2019-20.
- Verification of disclosures through site
 visits and virtual conference meetings
 with manufacturing units at Barabanki,
 Dahej, Hazira, Hoshiarpur, Jamnagar
 DTA, Jamnagar SEZ, Nagothane,
 Naroda, Patalganga, Silvassa and
 Vadodara; On-shore and off-shore
 exploration and production facilities at
 Gadimoga; Corporate office at Reliance
 Corporate Park, Navi Mumbai and review
 of key performance data from Shahdol.

Appropriate documentary evidences were obtained to support our conclusions on the information and data verified.

Where such documentary evidences could not be collected due to sensitive nature of the information, our team verified the same at the company premises.

CONCLUSIONS

Based on our assurance procedures and in line with the boundary, scope and limitations, we conclude that

- The selected sustainability parameters and disclosures presented in the Report by RIL are fairly represented.
- The sustainability disclosures as defined under scope of assurance are in alignment with the GRI standards.

 The company has also referred to other reporting criteria and emerging frameworks as mentioned under reporting criteria.

We have provided our observations to the Company in a separate management letter. These, do not, however, affect our conclusions regarding the Report.

INDEPENDENCE

The assurance was conducted by a multidisciplinary team including professionals with suitable skills and experience in auditing environmental, social and economic information in line with the requirements of ISAE 3000 (Revised) standard. Our work was performed in compliance with the requirements of the IFAC Code of Ethics for Professional Accountants, which requires, among other requirements, that the members of the assurance team (practitioners) be independent of the assurance client, in relation to the scope of this assurance engagement, including not being involved in writing the Report. The Code also includes detailed requirements for practitioners regarding integrity, objectivity, professional competence and due care, confidentiality and professional behaviour. KPMG has systems and processes in place to monitor compliance with the Code and to prevent conflicts regarding independence. The firm applies ISQC 1 and the practitioner complies with the applicable independence and other ethical requirements of the IESBA code.

RESPONSIBILITIES

RIL is responsible for developing the Report contents. RIL is also responsible for identification of material sustainability topics, establishing and maintaining appropriate performance management and internal control systems and derivation of performance data reported. This statement is made solely to the Management of RIL in accordance with the terms of our engagement and as per scope of assurance.

Our work has been undertaken so that we might state to RIL those matters for which we have been engaged to state in this statement and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than RIL for our work, for this report, or for the conclusions expressed in this independent assurance statement. The assurance engagement is based on the assumption that the data and information provided to us is complete and true. We expressly disclaim any liability or co-responsibility for any decision a person or entity would make based on this assurance statement.
